(54) Title: PACKING SYSTEM FOR THE BEVERAGE AND LIQUOR USING THE ALCOHOL ELEMENT

(57) Abstract: The cap of packing container is filled with liquid content. The container is filled with pure ice or ice produced by adding or diluting the secondary material. The secondary material storage chamber designed to enable the secondary material to be mixed with ice contained in the container when touching or opening a part of cap mounted on above container is installed. This secondary material storage chamber is filled with liquor not frozen at certain temperature. Above container is distributed based on the freezing system operated at certain temperature.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC B65D 51/28

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean Utility models and applications for Utility models since 1975

Japanese Utility models and applications for Utility models since 1975

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKOMPASS (KIPO internal)

keywords: "alcohol", "spout pouch", "ice", "container" and similar terms.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
