(54) Title: CHAIR MOUNTED BACK SUPPORT SYSTEM

(57) Abstract: A chair mounted lumbar and trapezius support sys-
tem (10A) that offers the support for an individual required to work
leaning forward in an office style chair (14) for a prolonged period of
time. The device reduces the strain on the back by supporting the in-
dividual in the abdominal area of body. Adjustable elbow rests (18A)
mount to the support belt structure (26A) to support the elbows and
allow maximum movement of the arms while remaining in a fixed po-
sition with relation to the torso when an individual is leaning forward
or twists to one side or the other doing delicate work. The support
belt structure is either permanently or removably attachable to an of-
fice chair using fasteners, belts or a flexible support.
