# UNITED STATES PATENT OFFICE.

AMOS B. CASSELMAN, OF WASHINGTON, DISTRICT OF COLUMBIA.

## DESIGN FOR AN ORANGE-KNIFE.

SPECIFICATION forming part of Design No. 32,846, dated June 19, 1900.

Application filed May 17, 1900. Serial No. 17,069. Term of patent 14 years.

*To all whom it may concern:*

Be it known that I, AMOS B. CASSELMAN, a citizen of the United States, residing at Washington, in the District of Columbia, have invented a new and original Design for Orange-Knives, of which the following is a specification.

My invention relates to a new and original ornamental design for orange-knives and is shown in the accompanying drawings, in which—

Figure 1 is a perspective view; Fig. 2, a front view, and Fig. 3 a cross-section.

The leading feature of my design consists in an orange-knife the blade of which for a portion of its length converges to a sharp edge at one side, the end of the blade on the same side being provided with a laterally-projecting hook, one edge of which converges to a sharp cutting edge, contiguous and at an angle to which is a flattened shoulder.

In the said drawings the reference-numeral 1 indicates the orange-knife, having a handle 2 and a blade 3. The back of the blade is

broad and flattened, and the sides 4 thereof converge to a sharp cutting edge 5 at the front, which extends the greater length of the blade. The end of the blade, as shown, is formed with a hook 6, projecting laterally from the front of the blade in advance of the edge 5. One edge of the hook converges to a sharp cutting edge 7. Adjacent the sharp edge of the point and between the same and the sharp longitudinal edge of the blade is a flattened shoulder 8.

My design presents an orange-knife of novel and pleasing appearance.

Having thus described my invention, what I claim is—

The design for an orange-knife substantially as herein shown and described.

In testimony whereof I have hereunto set my hand in presence of two subscribing witnesses.

AMOS B. CASSELMAN.
