(54) Title: SQUEEZE BOTTLE AND PUMP COMBINATION

(57) Abstract: A flexible squeeze bottle(10, 30, 50) for containing and dispensing a viscous liquid has a dispenser pump device (18) at one end of the bottle. The pump device consists of a cap (16), a plunger operator (19), a hollow tube (20) and a pump rod (21). The hollow tube is disposed within the flexible bottle for pumping the viscous liquid within the bottle through an outlet opening (22) in the plunger operator for selectively dispensing the viscous liquid therefrom. Another dispensing device, provided at an opposite end of the bottle, includes a closed and sealed opening (26, 32, 54). The closed and sealed opening is manually openable and closable by the user for selectively dispensing the viscous liquid within the squeeze bottle therefrom.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
