(54) Title: AUTOMATED ARRANGEMENT FOR PLAYING OF A MEDIA FILE

(57) Abstract: System, method and computer program product for rejecting or deferring the playing of a media file (200A) retrieved by an automated process. Rejection or deferral of an automatically playing media file is accomplished by a simplified user interface (60) which presumes that a currently playing media file is acceptable unless the user signals the media player within a given timeframe. Signaling of the media player is accomplished using one or more sensors (75.) The sensors include but are not limited to a motion sensor, an inclination sensor, a gesture sensor, a video sensor, a push-button switch and any combination thereof. The rejection or deferral of a media file by the user results in that file not being automatically selected again by the automated processes for at least a predetermined amount of time.

A. CLASSIFICATION OF SUBJECT MATTER

IPC: **G06N 5/00(2006.01)**

USPC: 706/45

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 706/45

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EAST, IEEE, ACM

* Special categories of cited documents:			
"A"	document defining the general state of the art which is not considered to be of particular relevance	"T"	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E"	earlier application or patent published on or after the international filing date	"X"	document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y"	document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O"	document referring to an oral disclosure, use, exhibition or other means	"&"	document member of the same patent family
"P"	document published prior to the international filing date but later than the priority date claimed
