(54) Title: A SMOKING ARTICLE

**FIG. 1**

(57) Abstract: A smoking article comprises a first part (111) comprising a source of smokable material and a second part (112) comprising a rod article and configured to be rotatable relative to the first part. A first indexing surface (116) on the first part and a second indexing surface (304) on the second part are configured to engage to index the rotation between the first and second parts. At least one of the first or second parts comprise a control element (250) configured to control a ventilation of the smoking article and a ventilation area (270) in the other of the first or second parts of the smoking article from the control element, the ventilation area configured to be selectively covered by the movable control element, wherein the second part comprises a connecting section connecting the rod article to the first part of the smoking article, and the connecting section is affixed to or supports the second indexing section.

\* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
