(54) Title: ANNOTATING MEDIA CONTENT WITH RELATED INFORMATION

(57) Abstract: A method 300 for retrieving media content (120). The method can include receiving metadata (118) associated with a first media file, receiving the first media file, processing at least the metadata to identify at least a second media file (124) likely to be of interest to a user, and automatically downloading the second media file. Processing the metadata can include identifying at least one parameter contained in the metadata and/or the first media file that correlates to the second media file. Metadata (122) also associated with the second media file also can be downloaded.

* Special categories of cited documents		"T"
"A"	document defining the general state of the art which is not considered to be of particular relevance	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E"	earlier application or patent published on or after the international filing date	"X"
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"O"	document referring to an oral disclosure, use, exhibition or other means	"Y"
"P"	document published prior to the international filing date but later than the priority date claimed	document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
