(54) Title: MULTI-PIECE WALL BATHING ENCLOSURE

(57) Abstract: A bathing enclosure has a wall arrangement which supports one or more hanging accessories, such as a towel hook, soap dish and bottle rack. Multiple wall sections are mounted so that their top and bottom edges are spaced apart to create a lateral gap therebetween. The gap permits a hanger end of the accessories to fit up and over the upper edges of the wall sections. The accessories can be slid horizontally in the gap and either extend to the inside or outside of the enclosure. Preferably, adjacent wall sections overlap vertically and tilt backward toward the inside of the enclosure from top to bottom.
