UNITED STATES PATENT OFFICE.

ISAAC E. PALMER, OF MIDDLETOWN, CONNECTICUT.

DESIGN FOR A HAMMOCK-SPREADER.

SPECIFICATION forming part of Design No. 33,965, dated January 22, 1901.

Application filed December 28, 1900. Serial No. 41,426. Term of patent 14 years.

To all whom it may concern:

Be it known that I, ISAAC E. PALMER, a citizen of the United States, and a resident of Middletown, in the county of Middlesex and State of Connecticut, have invented and produced a new and original Design for a Hammock-Spreader, of which the following is a specification.

The essential feature of my design consists in a hammock-spreader provided with balls or knobs at its opposite ends.

In the accompanying drawings, Figure 1 is a view of the spreader in side elevation. Fig. 2 is a top plan view, and Fig. 3 is a transverse section on the line 3-3 of Fig. 1.

The shank or body of the spreader is denoted by a and presents in side elevation a slightly curved form. It is cylindrical in cross-section and presents a diametrical line b, dividing it into upper and lower longitudinal sections. It presents a series of perforations c along its side, and a series of screwheads d along its top. The balls or knobs at its opposite ends are denoted, respectively, by e and f.

What I claim is—

The design for a hammock-spreader substantially as herein shown and described.

In testimony that I claim the foregoing as my invention I have signed my name, in presence of two witnesses, this 24th day of December, 1900.

ISAAC E. PALMER.

Witnesses:

CHAS. M. SAUER,

PAUL S. CARRIER.
