(54) **Removable fixation of a window sash in an opening by ratchet means**

(57) A panel fixing system is described for rapid and secure fixing of a panel into a matching aperture simply by a push fit. The fixing system comprises male and female portions 22, 24 which engage each other with a ratchet action so that the panel can be pushed home into the aperture and retained there by the ratchet. A release mechanism is provided whereby the ratchet can be released from one side. A secondary lock out system is provided to secure the panel with respect to the aperture should force be used to overcome the ratchet action.

TECHNICAL FIELDS SEARCHED (IPC)

E06B

The present search report has been drawn up for all claims

Place of search	Date of completion of the search	Examiner
Munich	27 January 2010	Schwertfeger, C

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
