(54) Title: HANDLE ACCESSORY FOR GRASPING BY AMBULATORY CHILDREN

FIG. 1

(57) Abstract: A handle accessory attachable to a stroller, pram, shopping cart or other wheeled vehicle (collectively, "stroller") designed for grasping by ambulatory children walking beside the stroller. The handle includes one or more clamps mounted to a laterally elongated bar. The clamps may be of an adjustable-jaw, pivotable stud, or other design suitable for secure mounting on the stroller frame. The clamps can be adjustably tightened to secure the handle to a lower portion of a frame of the stroller. The handle is preferably adjustable to vary spacing between the clamps. A handle portion of the bar extends beyond an area between the clamps and thus is disposed to extend laterally of the stroller so that an ambulatory child may comfortably grasp the bar while walking beside the stroller. A cushioned grip member and an end cap may be provided on the handle portion of the bar.
