Abstract: The present invention provides a life vest container for containing a life vest at an aircraft seat. The life vest container includes a housing that defines a storage volume that is dimensioned to receive the life vest. An opening is formed in the housing that is dimensioned to provide access to the storage volume. A cover is dimensioned to generally block the opening and is movable from a first position wherein the storage volume is not accessible through the opening. A tamper-evident sealing material is positioned between the cover and the housing for sealing the cover to the housing when the cover is in the first position. The sealing material is configured to be irreversibly changed in a distinct manner when the cover is moved from the first position.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
   IPC: A47C 7/62 (2006.01); B63C 9/22 (2006.01); B65D 77/20 (2006.01)
   USPC: 297/188.01, 188.08, 188.12; 441/80, 88; 206/769, 770, 803, 807
   According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
   Minimum documentation searched (classification system followed by classification symbols)
   U.S.: 297/188.01, 188.08, 188.12; 441/80, 88; 206/769, 770, 803, 807
   Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
   Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT
