(54) Title: TV SCREEN TEXT CAPTURE

(57) Abstract: A method of processing television images consistent with certain implementations involves receiving a command from a television user interface to capture a television image; capturing and storing a frame of the television image to a frame memory device; receiving commands from the television user interface for editing the captured image to at least isolate a portion of the image; editing the captured image in accord with the editing commands; and storing the isolated portion of the image to a storage device for subsequent retrieval. This abstract is not to be considered limiting, since other embodiments may deviate from the features described in this abstract.
