(54) Title: MANAGEMENT OF PROFILES FOR INTERACTIVE MEDIA GUIDANCE APPLICATIONS

2009

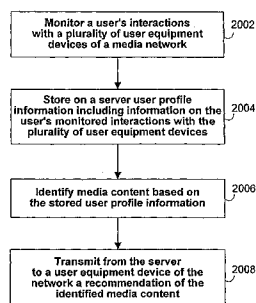

FIG. 20

(57) Abstract: Users of interactive media guidance applications may access media content and seek media guidance on a plurality of user equipment devices. A user profile server may be used for the management of a user's profile information. The user profile server may store a user's profile information including information about the user's media network and about user equipment devices associated with the user's media network. The user's profile information may be used to provide functionality to record media content on the most suitable user equipment device of a user's media network. The user's profile information may also be used to provide recommendations of media content based on a user's monitored interactions with a plurality of user equipment devices. The user's profile information may also be provided to user equipment devices of the media network not having the user profile information.
