(54) **Title:** FILTERING DATA WITH SLICER-STYLE FILTERING USER INTERFACE

FIG. 1

(57) **Abstract:** A slicer-style filtering user interface is provided that allows for advanced filtering and sorting of data and that may be utilized with a touch or gesture based computing device. The slicer-style filtering user interface may be invoked on a spreadsheet data range for filtering and sorting data according to desired properties. A slicer-style filtering user interface may be moved about on a displayed spreadsheet document for ease of use in proximity to one or more data items. If a theme or style is applied to a given spreadsheet document, the invoked slicer-style filtering user interface may be automatically themed or styled to match the document. The slicer-style filtering user interface may be operable for advanced filtering, and the user interface may be efficiently changed from one filtering type to another filtering type.
