(54) Title: ENHANCED INTEGRATED GAMBLING PROCESS FOR GAMES WITH EXPLICIT RANDOM EVENTS

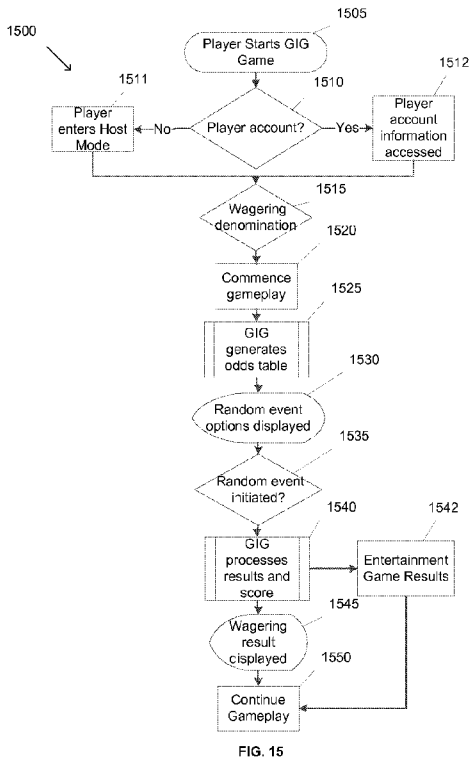

FIG. 15

(57) Abstract: A gambling hybrid game with a gambling integrated game is disclosed. The gambling hybrid game includes an entertainment system engine that provides an entertainment game to a user, a real world engine that provides gambling games to one or more users, and a game world engine that monitors the entertainment game and provides gambling games when appropriate. The entertainment system engine provides an entertainment game that includes random events. When a random event occurs in the entertainment game, the entertainment system engine resolves the random event and provides the results of the random event to the game world engine. The game world engine receives the results of the random event and determines gambling results based upon the results of the random event.
