(54) Title: METHOD AND APPARATUS FOR COATING GLASS SUBSTRATE

(57) Abstract: The present invention relates to a coating process for coating a surface (8) of a glass substrate (6) in normal air pressure, in which coating process at least one liquid starting material is atomized into droplets (12) and the formed droplets (12) are guided towards the surface to be coated (8). The formed droplets (12) are vaporized substantially close to the surface to be coated (8) before the droplets (12) contact the surface to be coated (8) by bringing to the coating process the thermal energy needed for vaporizing the droplets (12) with the glass substrate (6).

A. CLASSIFICATION OF SUBJECT MATTER
 INV. C03C17/00 C23C16/448
 ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
 C03C C23C

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
