CLAIM

The ornamental design for an electronically controllable module illuminated wall for displaying advertising material and the like, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an electronically controllable module illuminated wall for displaying advertising material and the like;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a side elevational view thereof;

FIG. 5 is a bottom plan view thereof; and

FIG. 6 is an enlarged perspective view of one module with its front portion opened to allow insertion or removal of an exemplified transparency.

The broken line showing of a transparency is for illustrative purposes only and forms no part of the claimed design.
FIG. 1

FIG. 4
