London WC2A 3LS (GB)

(54) Disc cartridge

(57) A disc cartridge comprises an upper casing member (1) and a lower casing member (2). A cover (30) is fitted in the casing to be slidable along guide grooves (24) and including a disc receiving section (37). The cover can be drawn out through a disc takeout opening (15) for taking out a disc (4) from a casing. This permits the disc (4) to be readily taken out from the casing by merely drawing out the cover (30) from the casing. A shutter (5) is provided to selectively closing such holes as head insertion holes (12, 22) and drive shaft insertion holes (11, 21). A disc support section (36) is provided by the bottom wall of the cover which has side wall portions (35) provided with disc holding portions (36). Thus a disc (4) is prevented from being inadvertently detached from the cover (30).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 30 7335

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
