(54) Title: SHARING DATA BETWEEN OPERATING SYSTEMS

(57) Abstract: The present invention discloses a technique for sharing data between at least two operating systems. In accordance with the present invention, a volume is provided in a data storage device. The provided volume is a portion of memory within the data storage device. The provided volume is accessible by a source operating system residing on a source computer and a target operating system residing on a target computer. Data is generated within the provided volume using the source operating system. The generated data is in a format that is readable by the target operating system.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- * & * document member of the same patent family
