FIG. 1 is an elevational view of a drinking glass or the like showing my new design;
FIG. 2 is a top plan view thereof;
FIG. 3 is a bottom plan view thereof; and
FIG. 4 is a sectional view taken along line 4—4 of FIG. 1.

The characteristic feature of the design resides in the provision of fluting along the external surface thereof with each flute being concave adjacent the base thereof and uniplanar adjacent the top edge thereof and merging smoothly from the concavity at the base to the uniplanar configuration at the top edge and fluting on the internal surface thereof which is uniplanar along the top edge thereof whereby to define a top edge of uniform thickness as shown in the drawing.

I claim:
The ornamental design for a drinking glass or the like, as shown and described.
