(54) Title: METHOD AND SYSTEM FOR EVENT BASED DATA COMPARISON

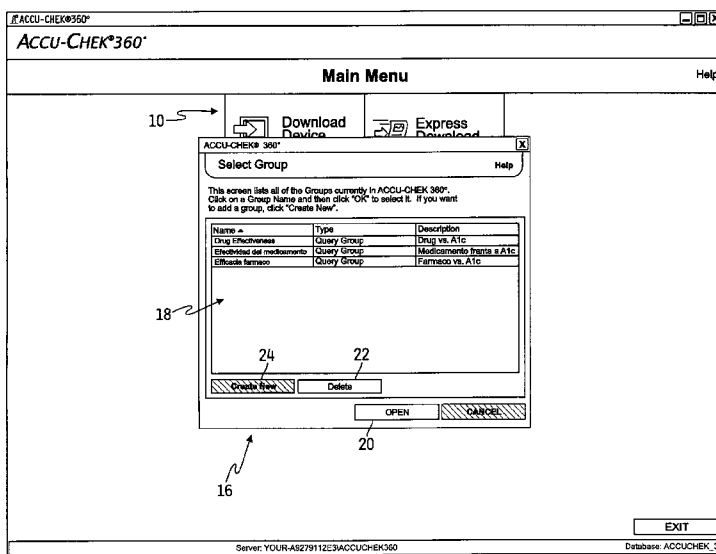

FIG. 2

(57) Abstract: A method of displaying medical data for at least one patient allows the data to be displayed in graphical format as either a trend graph or a histogram. The data may be sorted based upon a selected event. The trend graph may include a line representing the event, and the data on the graph may be plotted on the graph for specific periods before and after the event. When the data is displayed as a histogram, the data prior to the event is represented by one type of bars, and the data after the event is represented by another type of bars. The selected event, and the type of data displayed on the graph may be altered.

A. CLASSIFICATION OF SUBJECT MATTER
INV. G06F19/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
G06F G06T

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
