(54) Title: ELECTRICAL CONNECTOR SYSTEMS WITH LATCHING ASSEMBLIES AND METHODS

(57) Abstract: An electrical connector system (10) with a first connector housing (26) with a first conductive member (28) and a second connector housing (46) with a second conductive member (60). At least one latch assembly (14) is connected at each end to the first connector housing (26) and has a beam (42) between the ends which extends along and is spaced out from the first connector housing (26). A projection (16) and an actuation member (18) extends out from the beam of the latching assembly (14). The second connector housing (46) has an aperture (22) shaped and sized to detachably mate with the projection (16) when the second connector housing (46) with the second conductive member (60) is mated with the first connector housing (26) with the first conductive member (28). The actuation member (18) is used to release the projection (16) from the aperture (22) when engaged.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US05/33149

A. CLASSIFICATION OF SUBJECT MATTER IPC: H01R 13/627(2006.01)				
USPC: 439/352,353,357,358;D13/146 According to International Patent Classification (IPC) or to both national classification and IPC				
B. FIEL	DS SEARCHED			
Minimum documentation searched (classification system followed by classification symbols) U.S.: 439/352,353,357,358;D13/146				
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched				
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)				
C. DOCUMENTS CONSIDERED TO BE RELEVANT				
Category *	Citation of document, with indication, where a	ppropriate, of the relevant passages	Relevant to claim No.

Further	documents are listed in the continuation of Box C.	See patent family annex.		
Special categories of cited documents: "T"			rnational filing date or priority	
"A" document defining the general state of the art which is not considered to be of particular relevance		date and not in conflict with the application but cited to understand the principle or theory underlying the invention		
"E" earlier application or patent published on or after the international filing date		"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone		
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)		"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination		
"O" document referring to an oral disclosure, use, exhibition or other means		being obvious to a person skilled in the	e art	
"P" document published prior to the international filing date but later than the priority date claimed		"&" document member of the same patent family		
Date of the actual completion of the international search		Date of mailing of the international search report
