UNITED STATES PATENT OFFICE.

ALICE PASS, OF NEW YORK, N. Y.

MUFF.

SPECIFICATION forming part of Letters Patent No. 238,606, dated March 8, 1881.

Application filed December 27, 1880. (No model.)

To all whom it may concern:

Be it known that I, ALICE PASS, of the city, county, and State of New York, have invented a new and useful Improvement in Satchel-Muffs, of which the following is a full, clear, and exact description.

Figure 1 is a perspective view of my improvement. Fig. 2 is a rear elevation of the same extended and partly in section. Fig. 3 is a sectional elevation taken through the line *x x*, Fig. 2.

Similar letters of reference indicate corresponding parts.

The object of this invention is to increase the conveniences of muffs by adding a satchel thereto.

The invention consists in making a satchel-muff with a gathered satchel-opening upon the top and with hand-apertures below, arranged at right angles with the satchel-opening; and also in the combination, with the exterior side of the muff, of a pocket, as will be hereinafter fully described.

A represents a muff which is made with an opening, D, in its top at right angles with the hand-apertures B, to form a satchel. The satchel D is shirred to receive ribbons or cords E, so that the satchel-opening can be gathered and closed by drawing upon the ribbons E.

In the rear side of the muff A is formed a pocket, F, to receive a pocket-book. The opening of the pocket F is covered by a flap or lappel, secured in place, when closed, by a button or other convenient fastening.

The front of the muff can be ornamented by a cord and tassels, bows of ribbon, or in any other desired manner.

In carrying the muff the loops of the ribbons E are passed over the arms before the hands are inserted in the hand-apertures B, so that the muff will not fall should the hands be withdrawn from the said hand-apertures.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

1. As an improved article of manufacture, a satchel-muff, A, made, substantially as herein shown and described, with an open gathered top satchel, B, with hand-apertures below, arranged at right angles with the satchel-opening, as set forth.

2. The combination, with the muff A, of the top satchel, D, and the gathering-ribbons E, substantially as herein shown and described.

ALICE PASS.
