UNITED STATES PATENT OFFICE.

ORREN M. SMITH, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR AN UMBRELLA-FERRULE.

SPECIFICATION forming part of Design No. 20,249, dated October 28, 1890.

Application filed August 14, 1890. Serial No. 362,035. Term of patent 14 years.

To all whom it may concern:

Be it known that I, ORREN M. SMITH, a citizen of the United States of America, residing at Philadelphia, in the county of Philadelphia and State of Pennsylvania, have invented a new and original Design for Ferrules; and I do hereby declare the following to be a full, clear, and exact description of the same, reference being had to the accompanying drawing, and to letters of reference marked thereon, which form a part of this specification.

In the drawing the figure is a view of a ferrule showing my design.

The leading features of my design consist of a ferrule A, having the tip or point and a conical or cylindrical body, the surface of which is ornamented, so as to have irregular and indented portions in close proximity to

each other to produce on the polished surface a dead finish satin-like in appearance. The above finish may be set off by plain and smooth bands *a a*. The appearance of the article thus ornamented is highly pleasing, the effect being different from the crepe-like appearance heretofore given to metal, in that it approximates in appearance the luster of satin.

I claim—

The design for a ferrule, substantially as herein shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

ORREN M. SMITH.

Witnesses:

ROBERT WINTERBOTTOM,
JOHN W. SPROWLES.
