(54) Title: FLUX AND METHOD OF MAKING SAME

(57) Abstract: The invention relates to a desulphurising flux comprising alumina dross formed into agglomerated particles of a size distribution of between 3 mm and 40 mm, preferably between 3 mm and 60 mm in maximum cross dimension by means of a suitable binder material. Also provided is a method of converting fine powdery alumina dross into such particles. Cement may be used as a binder material. The particles may be calcined.

A. CLASSIFICATION OF SUBJECT MATTER
INV. C21C7/064 C04B35/10

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

C04B C21C

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, COMPENDEX

* Special categories of cited documents :

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
