(54) Title: CARD READER FOR MOBILE DEVICE

FIG. 2

(57) Abstract: A card reader for use with a mobile device includes a rotatable face that can be rotated over a portion of the mobile device so that when the user slides a card through the card reader, the overlapping portion of the rotatable face prevents the card reader from spinning or rotating. A foot and/or a housing for a jack on the bottom of the card reader prevents the card reader from accidentally turning off the mobile device during use.
