(54) **Patterns having variable colors**

(57) A pattern having variable colors can be attached on a soft material of wearing apparels or household cloths. The pattern is constituted of decorative blocks provided on the surface of the cloth or the soft material and a plurality of color-shielding pieces embedded on the surface of the decorative blocks. At least two opposite outer sides of the color-shielding piece are respectively provided with a colored block, so that the decorative blocks represent a visual effect of variable colors when viewed from different angles since the color-shielding pieces shield the colored blocks.
