(54) Title: METHOD FOR UPDATING AN APPLICATION SERVICE MANAGER IN APPLICATION MEMORY ELEMENTS

Fig. 4

(57) Abstract: A method for updating an application service manager (SM) that is installed in an application memory element (SE), which service manager (SM) is adapted to keep and change the status of applications (APP1, APP2, APP3), e.g. NFC services, comprises transmitting the status information (STAT) of the applications (APP1 - APP3) to a service update transfer agent (UTA) which is located in the application memory element (SE), wherein the service update transfer agent (UTA) stores the status information (STAT), replacing the application service manager (SM) by another release of the application service manager (SM_V2) in the application memory element (SE), re-transmitting the status of the applications (APP1, APP2, APP3) from the service update transfer agent (UTA) to the new release of the application service manager (SM_V2) and configuring the new release of the application service manager (SM_V2) with the status information (STAT).

WO 2009/077918 A3

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*
- *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*
- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments (Rule 48.2(h))*

(88) Date of publication of the international search report:

14 January 2010

Published:

- *with international search report (Art. 21(3))*

A. CLASSIFICATION OF SUBJECT MATTER
INV. G06F9/445

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	<p>EP 1 542 486 A (VODAFONE PLC [GB]) 15 June 2005 (2005-06-15) paragraph [0020] - paragraph [0021] ----- -/--</p>	1-12

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
