(54) Title: SESSION TRANSFER FROM A CIRCUIT SWITCHED NETWORK TO A PACKET SWITCHED NETWORK

Fig. 4

(57) Abstract: The invention relates to methods and nodes
for supporting a session transfer, for a user equipment, from
a circuit switched network to a packets witched network. Ac-
cording to one aspect a method for operating a control node of
a core network is provided. The method comprises the steps:
requesting from a radio access network of the circuit
switched network information on whether a capability of the
user equipment related to the session transfer are compatible
with a network configuration related to the session transfer;
receiving from the radio access network an indication wheth-
er the capability of the user equipment and the network con-
figuration are compatible; determining whether to indicate
that the session transfer is supported by using the received
compatibility indication; and setting an indication whether
the session transfer is supported according to the determina-
tion.
