(57) **CLAIM**

The ornamental design for a patient monitoring device with graphical user interface, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material to which a claim for copyright is made. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the U.S. Patent and Trademark Office patent file or records, but reserves all other copyrights whatsoever.

The FIGURE is a front view of a patient monitoring device with graphical user interface showing my new design.

The broken line showings of the patient monitoring device and the rectangle and the showings of text, namely, “BPM,” “RRa” and the bell icon are included for the purpose of illustrating environmental structure and portions of the graphical user interface and form no part of the claimed design.
