METHOD AND APPARATUS FOR PROCESSING IMAGE-BASED EVENTS IN A MEETING MANAGEMENT SYSTEM

A method and apparatus (300) are provided for processing image based events in a meeting management system. A method is provided for recording a meeting having at least one participant (200), comprising the steps of detecting at least one image processing event associated with the meeting; and recording the image processing event for subsequent playback. Each recorded image processing event is tagged with a time stamp and information about the event. In this manner, each image processing event can be broadcast to a remote user or recorded for subsequent playback. A method and apparatus are also provided for sharing an application with a plurality of participants in a meeting. The method comprises the steps of capturing an image of the application; and broadcasting the image of the application to each participant. The invention allows images of individual applications or an entire desktop to be shared.

☐ Further documents are listed in the continuation of Box C.  ☐ See patent family annex.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent published on or after the international filing date
  "L" document which may throw doubts on priority claims(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to an oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed

"I" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"A" document member of the same patent family
