(54) Title: SYSTEM AND METHOD FOR ELECTRONIC DATA DELIVERY

(57) Abstract: The present invention comprises a data delivery system for delivering oilfield data from an acquisition site (11) to a remote delivery site (12) comprising a central data hub computer (56) that processes a workflow order (230) for controlling delivery of the oilfield data, a data acquisition site computer (51) that transmits oilfield data over a first communications network to the central data hub (56) in near real-time in response to the workflow order (230) and a data server (58) that receives data from the central data hub (56) over a second communications network. The data server (58) communicates with multiple remote delivery site computers (52) for the simultaneous display of oilfield data in near real-time at the multiple delivery site computers (52) in response to the workflow order (230).

Patent family members are listed in annex.

° Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
