UNITED STATES PATENT OFFICE.

BENJAMIN F. THOMAS, OF DENVER, COLORADO.

MAGNETIC POCKET-BOOK.

SPECIFICATION forming part of Letters Patent No. 402,491, dated April 30, 1889.

Application filed December 27, 1888. Serial No. 294,759. (No model.)

To all whom it may concern:

Be it known that I, BENJAMIN F. THOMAS, a citizen of the United States, residing at Denver, in the county of Arapahoe and State of Colorado, have invented certain new and useful Improvements in Pocket-Books, of which the following is a specification, reference being had therein to the accompanying drawings, in which—

Figure 1 represents a view of an ordinary pocket-book with my invention applied to it, the flap being open; Fig. 2, a transverse sectional view of the book closed.

The object of the invention is to provide an ordinary pocket-book with an ordinary horse-shoe-magnet or loadstone, whereby the healing and nervine properties of the magnet will be administered to the person carrying the book in a constant and unobtrusive manner.

In the drawings, A designates the pocket-book proper; B, the flap of the same, consisting of two thicknesses of material stitched together; and C, the magnet stitched between the thicknesses of the flap.

I claim—

A pocket-book provided with a flap, and a magnet secured in the said flap, substantially as described.

In testimony whereof I affix my signature in presence of two witnesses.

BENJAMIN F. THOMAS.

Witnesses:

JULIUS BROWN,

E. S. BENNETT.
