Joshua Moore. Roane Co. Tennessee

Letters Patent

The Schedule referred to in these Letters Patent and making part of the same containing a description in his own words of the said Joshua Moore himself of his improvement in a machine for cutting Staves

To all whom these presents shall come

Be it known that I Joshua Moore of the County of Roane in the State of Tennessee have invented a new machine or a new and useful improvement for cutting Staves and that the following is a full and exact description of the construction and operation of the said machine as invented by me

The Box is in the usual form for cutting Staves or Hoops — The improvement is in having a short Knife facing the front of the Box fastened to an upright Iron Bar which is attached to a Saddle that works between the front feet of the Box and one end of the Saddle is fastened to the left leg of the Box with a Spring under it to raise it and the other end sliding through the right leg. The Box is faced with iron having cut a groove in which the Knife plays
