(54) Title: SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR DEVELOPING, CONFIGURING, INSTALLING AND TESTING SOFTWARE

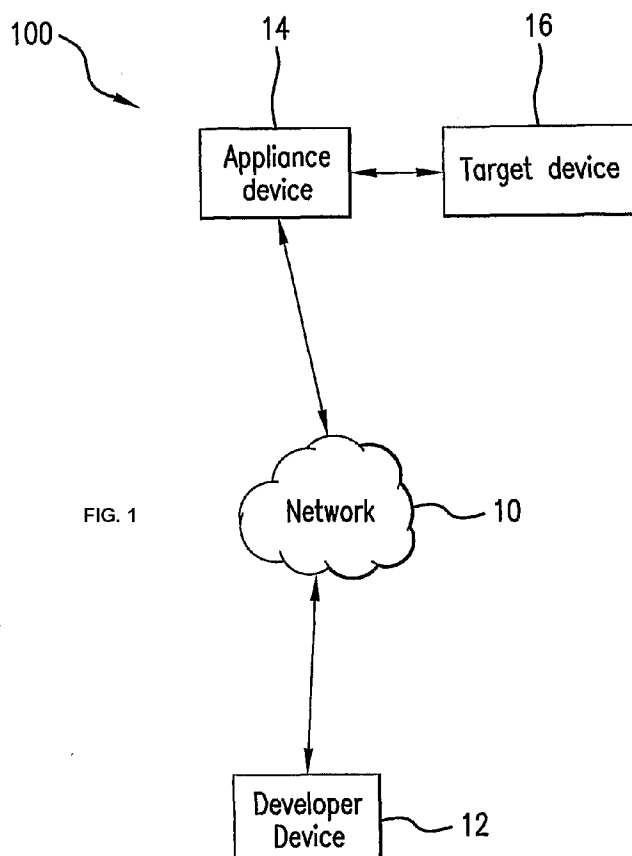

FIG. 1

(57) Abstract: The present invention provides a system for developing software. In one embodiment, the system (100) includes: a developer device (12) having a developer control program for communication over a network (10), the developer device (12) being used by a developer to create source code; and an appliance device (14) having a communication server module for communication over the network (10) with said developer control program, the appliance device (14) being adapted to compile the source code to create executable code for a target device (16), wherein the executable code is installed on and executed by the target device (16).
