(54) Title: DIGITAL MEDIA FILE IDENTIFICATION

(57) Abstract: A method and apparatus for identifying, tracking and monitoring digital media files is provided. The system provides numerous methods of interfacing with a content outlet. The methods further include comparing attributes of content to be downloaded with attributes of content in a media database. The methods also includes providing restrictions based on a result of the comparing. The methods further include monetizing the methods between both retailers and rights-holders using the system. Additionally, the method may include providing retail analysis, resolving disputes, and distributing royalty payments to rights-holders of content.
