(54) Title: NARROW MODE NAVIGATION PANE

(57) Abstract: A narrow mode navigation pane [400] is provided that may be selectively displayed as a replacement of a normal mode [230] or full-size navigation pane to allow more computer display space for displaying other user interface content. The narrow mode navigation pane [400] is divided into sections. Selection of a "Navigation Pane" control [255, 260, 265, 270] causes the temporary display of a pop-up [700] version of the normal mode navigation pane [230] for allowing a user to view and/or select the full contents of the normal size navigation pane [230] without toggling to the normal mode navigation pane [230]. Other sections of the narrow mode navigation pane [400] may include selectable controls representing a useful subset of controls normally populated in the normal mode pane [230].
