(54) Title: SENSOR CONFIGURATIONS IN A USER INPUT DEVICE

(57) Abstract: Method and device relate to improved sensor configurations in a user device are disclosed. A device implements the improved sensor configurations includes a switch configured to detect a force applied by a user, one or more touch sensors configured to detect an angular position of the user input which are peripherally located relative to the switch, and a processor configured to generate a signal for performing a task selected from a plurality of predefined tasks in accordance with the force and the angular position of the user input.

A. CLASSIFICATIONOF SUBJECT MATTER
INV. G06F3/033 H01H25/04

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
HOlH G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
EPO-Internal , WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

'E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which Is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

[1]P" document published prior to the International filing date but later than the priority date claimed

"T[1] later document published afterthe international filing date or priority date and not in conflict with the application but cited to understand **the** principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an invenlive step when the document is combined with one or more other such docu¬ments, such combination being obvious to a person skilled in the art.
