(57) **CLAIM**

The ornamental design for a water spray nozzle, as shown and described.

DESCRIPTION

FIG. **1** is a side elevation view of an assembled water spray nozzle showing my new design, the water spray nozzle assembled from a female tubular member, a male tubular member attached to the female tubular member, two O-rings surrounding the male tubular member, and a sleeve surrounding the female tubular member;

FIG. **2** is a left end view of the water spray nozzle shown in FIG. **1**;

FIG. **3** is a right end view of the water spray nozzle shown in FIG. **1**;

FIG. **4** is a left end perspective view of the water spray nozzle shown in FIG. **1** with the sleeve removed;

FIG. **5** is a side elevation view of the unassembled female tubular member and male tubular member;

FIG. **6** is a side elevation view of the female tubular member shown in FIG. **5**;

FIG. **7** is a left end view of the female tubular member shown in FIG. **5**;

FIG. **8** is a right end view of the female tubular member shown in FIG. **5**;

FIG. **9** is a left end perspective view of the female tubular member shown in FIG. **5**;

FIG. **10** is a side elevation view of the male tubular member shown in FIG. **5**;

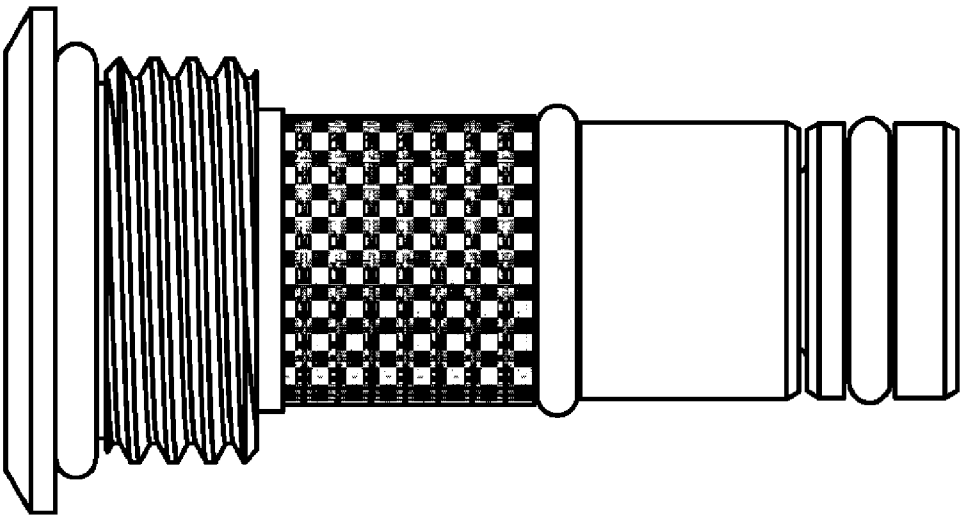

FIG. **11** is a left end view of the male tubular member shown in FIG. **5**;

FIG. **12** is a right end view of the male tubular member shown in FIG. **5**;

FIG. **13** is a left end perspective view of the male tubular member shown in FIG. **5**; and,

FIG. **14** is a right end perspective view of the male tubular member shown in FIG. **5**.
