Title: FLUID CHANNELING APPARATUS

Abstract: An apparatus (10) for channeling the flow of body fluid from the body of a user into a container (12), the apparatus (10) including a generally frusta conical frame (14) defining an inlet (16) and an outlet (18); the frame (14) being shaped and dimensioned to allow for removable association of the container (12) with the apparatus (10), when in use; and wherein the container (12) is supported by the frame (14) when associated therewith. The invention also provides for a kit for collecting body fluid and a method of manufacturing the apparatus (10).

INTERNATIONAL SEARCH REPORT

International application No
PCT/IB 2007/052330

A  CLASSIFICATION OF SUBJECT MATTER

IPC8: A61F 5/451 (2006.01); A61B 10/00(2006.01)

According to International Patent Classification (IPC) or to both national classification and IPC

B  FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC8: A61F, A61B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

WPI, EPĐDOC

C  DOCUMENTS CONSIDERED TO BE RELEVANT

See patent family annex

* Special categories of cited documents
A: document defining the general state of the art which is not considered to be of particular relevance
E: earlier application or patent but published on or after the international filing date
L: document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
O: document referring to an oral disclosure, use, exhibition or other means
P: document published prior to the international filing date but later than the priority date claimed
T: later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
X: document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
Y: document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
&: document member of the same patent family

Form PCr/ISA/210 (patent family annex) (fully 1998; reprint January 2004)
Continuation of first sheet

Continuation No. II:

Observations where certain claims were found unsearchable

(Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

Claims Nos.: 22 to 27 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

Claims 22 to 27 contain references to the description and the drawings. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here.

Continuation No. IV:

Text of the abstract

(Continuation of item 5 of the first sheet)

An apparatus (10) for channeling the flow of body fluid from the body of a user into a container (12), the apparatus (10) including a generally frusta conical frame (14) defining an inlet (16) and an outlet (18); the frame (14) being shaped and dimensioned to allow for removable association of the container (12) with the apparatus (10), when in use; and wherein the container (12) is supported by the frame (14) when associated therewith. The invention also provides for a kit for collecting body fluid and a method of manufacturing the apparatus (10).
