

ABSTRACT

MOTOR VEHICLE DOOR

5 The invention relates to a motor vehicle door comprising a motor vehicle door lock (2), also a manipulation element (5) which is accessible from the outer side of the door and which can be impinged upon, in addition to a security unit (8, 10, 11) in the motor vehicle door lock (2) and driven by a motor (10) by means of one or more output elements (11). Said security unit, (8, 10, 11) can be controlled
10 by a motor or manually by means of the manipulation element (5) so that it is placed in a "locked" "unlocked" position. Said manipulation element (5) is connected to at least one output element (11) of the motor (10).
