

*Design No. 334. -*

*D. Rool.*

*Design for Store*

*Patented 12th November 1850. —*

D. Root of Cincinnati Ohio.  
 Letters Patent. No 334. Dated Nov. 12. 1850.

The Schedule referred to in these Letters Patent and making part of the same.

To all to whom these Presents shall come:

Be it known that I, D. Root of Cincinnati in the County of Hamilton and State of Ohio, have invented or produced a new and original Design for an Ornamental Office Stove and that the following is a full, clear, and exact description of the principle or character which distinguishes it from all other things before known, and of the usual manner of making, modifying, and using the same, reference being had to the accompanying drawings of which Fig. 1. is an Elevation and Fig. 2, a Plan of the base.

My Design is for an ornamental Office or Parlor Stove for burning Bituminous Coal. It consists of a circular base surrounded by a waving leaf moulding and supported on three legs of a graceful reeded form confined by scroll work. The words "D. Root, Cincinnati, and Patented 1850" are in relief on the flat part of the base. The fire chamber is formed of an inverted flaring cone, and is reeded as well as the parts surmounting it. The upper part of the Stove is globular, resting on a short cylinder, which expands into a cone which rests on the fire chamber. In the conical part is the fire door which has an ornamental register in its center. Two other similar registers are put at equal distances round the cone, and have four openings each, and are of a four leafed pattern. The Stove is surmounted with a handle which lifts off the top of the dome.

What I claim as new and which I desire to secure by Letters Patent, is the Design formed & ornamented substantially as above described, & represented in the accompanying drawings.

Witnesses.

Silas Cray
