**Fig. 2**

(57) Abstract: A smoking cessation device is provided. The smoking cessation device includes a dispensing member comprising porous plastic defining a matrix of an internal network of passages in communication with pores on the exterior of the device. The device is preferably sized and structured like a cigarette or other combustible smoking device. Residing within the matrix is a dispensate extractable therefrom upon exposure to a fluid. In one form the dispensate may be a tobacco derivative including one or more of nicotine, tobacco flavoring, menthol, vitamins, minerals, therapeutic agents, and/or additional flavorin.
