(54) **Perimeter alarm actuating module, particularly for a system of winding devices**

(57) An actuating module (5) for perimeter alarm system is described, in particular a system comprising one or more winding devices (1), each one with a push-button panel (2) that is connected with the other ones by means of a centralisation connection line (4), in such a way that during an attempt of intrusion one or more of the winding devices (1) send on the line (4) a digital signal, which identifies a state of perimeter alarm and is

suitable to activate first alarm mechanisms (27) that are provided in said winding devices (1). The aforesaid actuating module is connected to the line (4), in such a way that, when the perimeter alarm state identifying signal gets in, it activates second alarm mechanisms external to the perimeter alarm system.
