The ornamental design for a paper product, as shown and described.

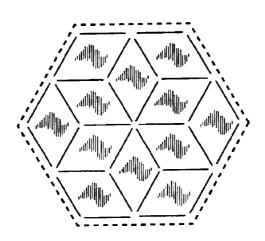

#### DESCRIPTION

FIG. 1 is a top plan view of a paper product showing the new design. The broken lines shown along the borders of FIG. 1 depict boundaries of the repeat unit of the paper product. The broken line boundaries indicate that the product has indeterminate length and width, and that the repeat unit continues uniformly throughout the length and width of the product. The broken lines form no part of the claimed design; and,

FIG. 2 is another top plan view of a paper product showing the new design, wherein the design shown in FIG. 2 is rotated 90° relative to the design shown in FIG. 1. The broken lines shown along the borders of FIG. 2 depict boundaries of the repeat unit of the paper product. The broken line boundaries indicate that the product has indeterminate length and width, and that the repeat unit continues uniformly throughout the length and width of the product. The broken lines form no part of the claimed

FIGS. 1 and 2 illustrate two examples of the orientation of the new design. It should be appreciated that the new design may be rotated at any degree of orientation.
