(54) Title: APPARATUS AND METHOD FOR REQUESTING INITIATION OF A COMMUNICATION SESSION USING CAPABILITY CONFIGURATION PARAMETERS WITH CARD APPLICATION TOOLKIT

(57) Abstract: A means by which a list of service options may be used as capability configuration parameters to specify a card application toolkit call setup command, such as from R-UIM applications, is provided. For example, when the R-UIM application sends a call setup command to a mobile communication station, the R-UIM application may also send a list of service options that may be used by the mobile communication station to negotiate with the network. During the service negotiation process of setting up the call, the mobile communication station will only use or accept a service option that is in the service option list.
