(54) Title: MOBILE DEVICE FOR PROVIDING FILTERED CASINO INFORMATION BASED ON REAL TIME DATA

(57) Abstract: A technique is disclosed for displaying filtered casino-related information on a mobile device. In one implementation aspects of the inventions may be embodied in a mobile device which includes at least one interface operable to provide a wireless communication link to other network device in a casino data network. According to various embodiments, casino information relating to various casino activities may be acquired by the mobile device and/or other devices in the casino network. Geolocation information relating to a current location of the mobile device may also be acquired. A first set of filter parameters may be identified and/or generated for use in generating filtered casino information. Filtered casino information may be generated by applying the first set of filter parameters and geolocation information to the acquired casino information. At least a portion of the filtered information may be displayed to a user via a display at the mobile device.
