Figure 1 is a block diagram of a system for providing video content. The system includes a **Video Content Provider** (14) which provides **Video Content** to a **Television or Display Device** (15). The **Video Content Provider** (14) also provides **Video Content Plus Linked Video Files** to a **Server** (12). The **Server** (12) is connected to a **Viewer Interaction Platform** (13). The **Viewer Interaction Platform** (13) contains a **Viewer Frame Interaction Application** (15) which includes a **Display Window** (16) and a **Browser Window** (17) with a **Get TV Image** button (18). The **Viewer Interaction Platform** (13) is also connected to a **Timing Device** (19). The **Timing Device** (19) is connected to the **Video Content Provider** (14) and the **Television or Display Device** (15). The **Television or Display Device** (15) is connected to the **Viewer Interaction Platform** (13) via a dashed line.

(S7) Abstract: In accordance with the invention (Fig. 1A), a video frame interaction application, resident on the viewer interaction platform (13), allows a viewer to select specific frames from the video content, as it is broadcast and stores these frames in the memory of the viewer interaction platform. If the viewer interaction platform has limited memory, an Internet link to the image can be saved. The frames are chosen by activating an entry key on the viewer interaction platform. The user selection is either sent to the Website (12) for immediate retrieval of the selected frame, or alternatively, the requested linked is saved for later access to the Website. The Website, upon request, sends the selected frame to the video frame interaction application which allows the viewer to access the pixel objects and link to other resource platforms.

A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : H04N 7/173; G09G 5/00, 5/02

US CL : 725/87, 88, 89, 90, 95, 100, 134; 345/589, 619, 624, 681

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 725/87, 88, 89, 90, 95, 100, 134; 345/589, 619, 624, 681

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents:		"T"	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"A"	document defining the general state of the art which is not considered to be of particular relevance	"X"	document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"B"	earlier document published on or after the international filing date	"Y"	document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"&"	document member of the same patent family
"O"	document referring to an oral disclosure, use, exhibition or other means		
"P"	document published prior to the international filing date but later than the priority date claimed
