By atty.,

Ezra Seymour
To all whom it may concern:

Be it known that I, Henry L. Wallace, of Wallingford, in the county of New Haven and State of Connecticut, have invented a new Design for the Handles of Spoons, Forks, &c.; and I do hereby declare the following, when taken in connection with the accompanying drawing and the letters of reference marked thereon, to be a full, clear, and exact description of the same, and which said drawing constitutes part of this specification and represents, in the figure, a face view.

This invention relates to a design for the handles of spoons, forks, &c., and the design consists in the configuration and ornamentation as shown in the accompanying illustration.

As herein shown, the handle gradually expands from the bowl to the tip. The face of the handle is ornamented by a border of scrolls A, which increase in size from the contracted portion of the handle toward both ends and inclose a plain panel B. At the tip the outer ends of the scrolls form a scalloped edge. Between the inner edge of the border and the panel B is a row of beading C, the beads of which contract in size as they approach the narrow portion of the handle.

I claim—

The design for the handles of spoons, forks, &c., as herein shown and described.

In testimony whereof I have signed this specification in the presence of two subscribing witnesses.

H. L. WALLACE.
